LeanIX GenAI Portfolio Analyzer

Application Portfolio Rationalization Report

Powered by Claude · Anthropic

Executive Summary

Portfolio analysis reveals $1.59M in potential annual savings through retirement of 7 end-of-life/low-value applications and $3.69M in on-premise infrastructure at risk. Critical modernization needed for 3 high-value billing/finance systems carrying tech debt 7-9 that cannot be retired. Immediate action required on Legacy Inventory System (Risk 9.4) and Legacy CRM v1 (Risk 9.6).

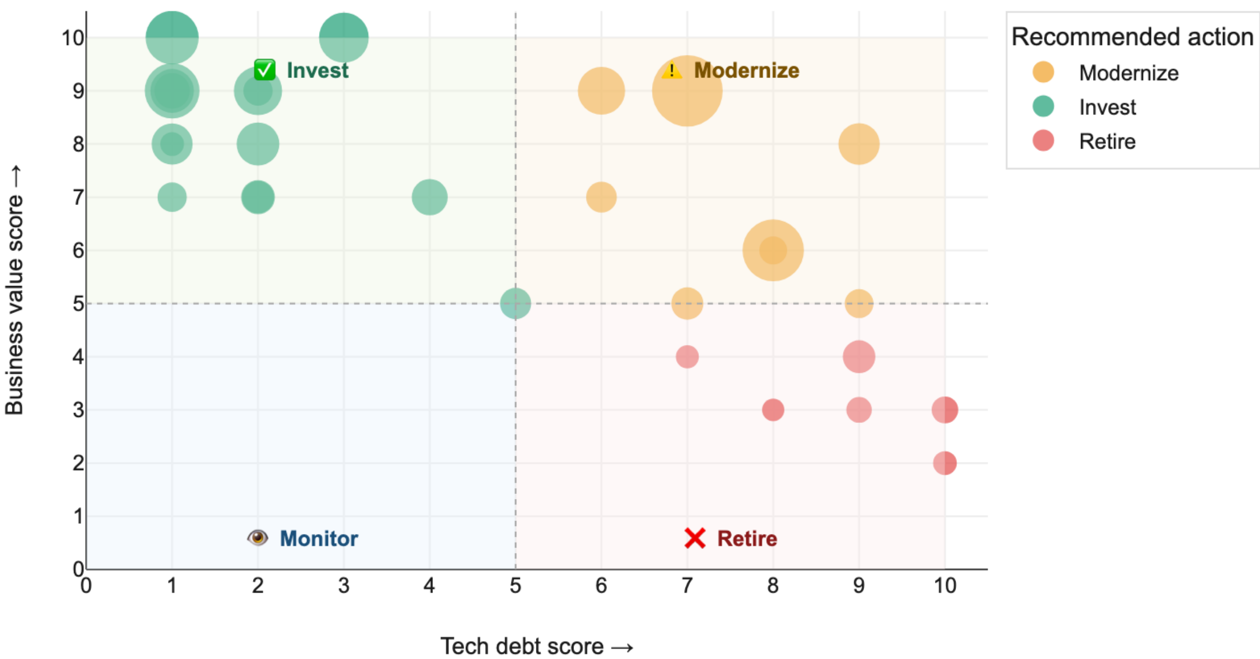
Total identified saving opportunity: $1,590,000 / year

Portfolio Overview

30	$7,595,000	13	10
Total applications	Annual spend	High tech debt (≥7)	Retire candidates

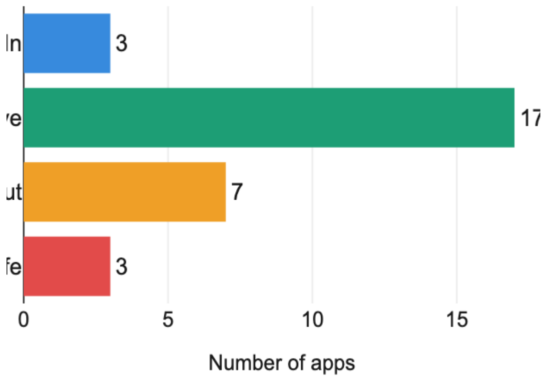
Portfolio Analytics

📊 Portfolio rationalization quadrant — tech debt vs business value

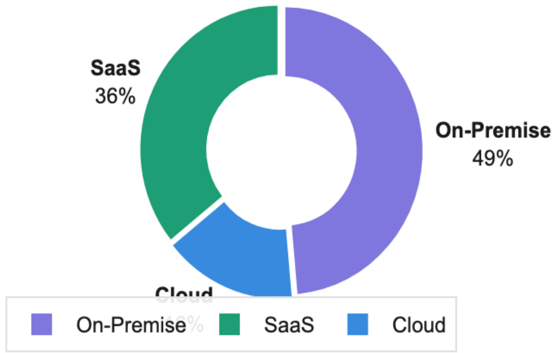


Bubble size = annual cost · Colour = recommended action

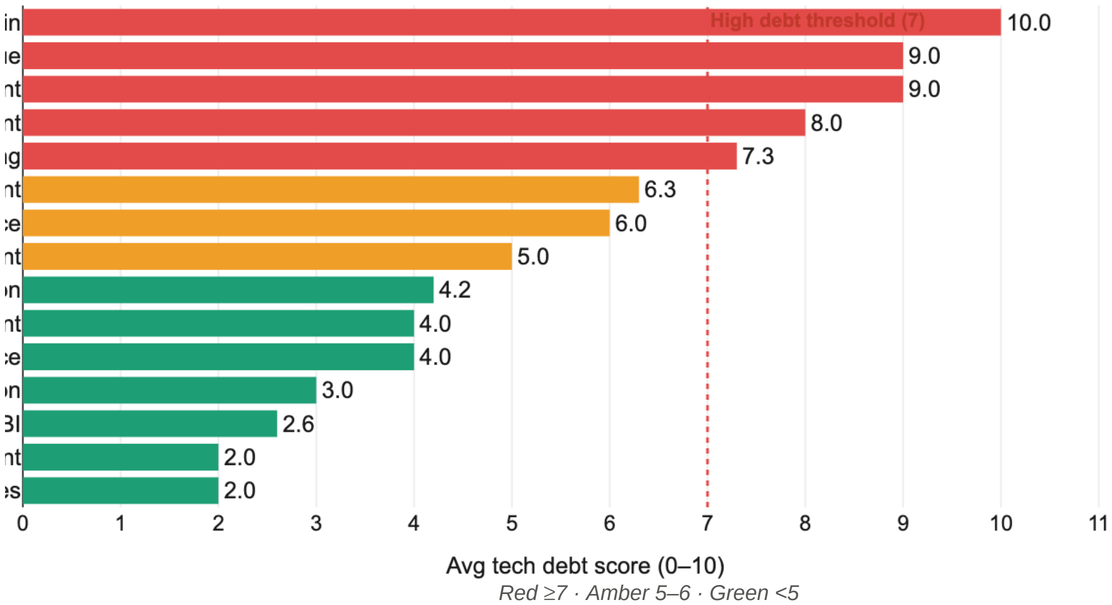
📋 Apps by lifecycle stage



💰 Annual cost by hosting type



🏢 Avg tech debt score by business capability



Retirement Candidates

Applications recommended for decommissioning based on low business value, high technical debt, or end-of-life status.

Legacy CRM v1

Save $95,000/yr

End of Life status with maximum tech debt (10/10) and minimal business value (2/10). Replaced by Salesforce CRM and Zendesk Support.

Urgency: immediate

Legacy Inventory System

Save $120,000/yr

End of Life with critical risk score (9.4), maximum tech debt (10/10), and lowest business value (3/10) in Supply Chain capability.

Urgency: immediate

Legacy Asset Mgmt

Save $110,000/yr

End of Life system, 12 years old, tech debt 9/10, business value 3/10. No modern replacement identified but age and risk justify retirement.

Urgency: immediate

Custom Reporting Tool

Save $85,000/yr

Phase Out status with high tech debt (8/10) and low business value (3/10). Fully replaced by Tableau, Power BI, and AWS Data Lake.

Urgency: 6-months

Legacy Document Store

Save $80,000/yr

Phase Out, 11 years old, tech debt 8/10, business value 3/10. Content management consolidated to modern platforms.

Urgency: 6-months

Custom Approval Engine

Save $90,000/yr

Phase Out with tech debt 7/10 and low business value (4/10). Workflow capabilities now covered by SAP ERP and ServiceNow.

Urgency: 6-months

Legacy HR Portal

Save $180,000/yr

Phase Out with tech debt 9/10, replaced by Workday HCM (Phase In). Complete migration to retire within 12 months.

Urgency: 12-months

Modernization Priorities

High-value applications with significant technical debt that cannot be retired — require re-platforming or refactoring.

Custom Billing Engine

HIGH priority

High business value (8/10) but critical tech debt (9/10) at 9 years old. Core revenue system with $290K annual cost and risk 7.6.

Approach: Cloud-native rebuild or replace with SaaS billing platform (e.g., Zuora, Stripe Billing). Phased migration to minimize revenue disruption.

Oracle Financials

HIGH priority

Phase Out but still has business value (6/10). Tech debt 8/10, $640K annual cost, 8 years old. Critical finance capability.

Approach: Consolidate into SAP ERP Core or migrate to cloud ERP (Oracle Cloud, NetSuite). Coordinate with SAP modernization effort.

SAP ERP Core

HIGH priority

Highest cost system ($850K/yr) with high business value (9/10) but tech debt 7/10 at 6 years. Core finance platform on-premise.

Approach: Migrate to SAP S/4HANA Cloud. Leverage SAP RISE program for accelerated cloud transformation with managed services.

Custom EDI Gateway

MEDIUM priority

Phase Out, tech debt 8/10, but provides integration value (6/10). 10 years old with risk 7.8.

Approach: Replace with modern B2B integration platform (MuleSoft B2B, IBM Sterling) or expand MuleSoft ESB capabilities for EDI.

Legacy Payroll

MEDIUM priority

Phase Out with tech debt 9/10 but still critical (business value 5/10). 12 years old, $140K cost, risk 8.5.

Approach: Migrate to Workday HCM payroll module or ADP/Paylocity SaaS. Coordinate with Workday HCM Phase In completion.

Custom Procurement

MEDIUM priority

Tech debt 7/10, business value 5/10, but Coupa is already Phase In as replacement. 9 years old, $175K annual cost.

Approach: Accelerate Coupa Procurement rollout and complete migration. Decommission custom system within 6-9 months.

MuleSoft ESB

LOW priority

High business value (9/10) but tech debt 6/10 at 5 years old. $380K on-premise cost with risk 4.7.

Approach: Upgrade to MuleSoft Anypoint Platform CloudHub or Flex Gateway for hybrid deployment. Modernize integration patterns.

Custom Risk Dashboard

LOW priority

Tech debt 6/10, business value 7/10, 7 years old. Compliance-critical but aging on-premise.

Approach: Rebuild on Power BI or Tableau platform leveraging existing BI investments. Integrate with Snowflake DWH for real-time data.

Key Risks

Critical legacy systems at End of Life supporting active operations

Affected: Legacy Inventory System, Legacy CRM v1, Legacy Asset Mgmt

Mitigation: Immediate 90-day retirement plan with data migration to modern replacements. Legacy Inventory requires urgent Supply Chain capability replacement or process re-engineering.

$3.69M in on-premise infrastructure with 13 high-debt applications creating security and maintenance burden

Affected: SAP ERP Core, Oracle Financials, Custom Billing Engine, MuleSoft ESB, SharePoint Intranet, Custom Procurement, Legacy Payroll, Custom EDI Gateway, Custom Approval Engine, Legacy HR Portal, Legacy Document Store, Custom Risk Dashboard, All Legacy Systems

Mitigation: Cloud-first rationalization strategy prioritizing highest cost/risk systems. Establish cloud migration center of excellence with SAP, Oracle, and billing system modernization as wave 1.

Finance & Accounting capability split across 4 systems with average tech debt 7.3/10 and $1.58M annual cost

Affected: SAP ERP Core, Oracle Financials, Custom Approval Engine

Mitigation: Consolidate to single cloud ERP platform (SAP S/4HANA Cloud recommended). Retire Oracle and Custom Approval Engine post-migration. 18-24 month program.

Supply Chain capability has highest tech debt (10/10) with end-of-life system and no modern replacement deployed

Affected: Legacy Inventory System

Mitigation: Emergency procurement of modern supply chain platform (SAP IBP, Blue Yonder, Kinaxis) or implement workaround in existing ERP. Cannot delay beyond 60 days.

Integration portfolio fragmentation with 5 systems and inconsistent patterns increasing maintenance complexity

Affected: MuleSoft ESB, AWS API Gateway, Kafka Event Bus, Custom EDI Gateway

Mitigation: Establish enterprise integration standards using MuleSoft as primary platform. Retire Custom EDI Gateway, maintain AWS API Gateway for cloud-native services, use Kafka for event streaming only.

Quick Wins

• Retire Legacy CRM v1 immediately (End of Life, fully replaced by Salesforce) - $95K annual saving with 30-day effort

• Retire Custom Reporting Tool within 90 days (replaced by Tableau/Power BI) - $85K saving, low migration complexity

• Complete Coupa Procurement rollout and retire Custom Procurement system - $175K saving, replacement already Phase In

• Accelerate Workday HCM adoption and retire Legacy HR Portal - $180K saving, Workday already deployed

• Consolidate collaboration on MS Teams and downgrade SharePoint to archive-only - reduce $165K SharePoint footprint by 60%

• Migrate Custom Risk Dashboard to Power BI Embedded (already licensed) - leverage existing investment, reduce tech debt from 6 to 1
